

ProCal-Track V4.34.4. provides a new function (with associated toolbar button) to allow all active jobs for a specific customer to be viewed. This function also allows the full job record for a specific instrument to be displayed simply by double clicking on the instrument from a list.

Viewing All Active Jobs For A Specific Customer

To view all jobs, click the toolbar button or select from the menu as shown below :

Select Customer

Select the required customer –

Note by starting to type in the customer name the list will filter to match, eg.

Typing 'bu' will filter to customers containing the character sequence 'bu'

Click SELECT to proceed

View Full Instrument Record for Customers Instrument

The list of active jobs will be displayed for the selected customer.

As a guide, the full description for each status code is displayed at the foot of the screen.

Double clicking on n instrument in the list will display the full instrument record.

List ALL current jobs [30 Matches]
